

I am a Growth Product Engineer who builds products, studies why people use them, and figures out how to make them grow. I work across product, engineering and growth, using data, behavioral insights and technology to solve complex problems and build products that scale.

PROFESSIONAL EXPERIENCE

PrimitivoSanchez.com — Freelance Fullstack Developer & Designer Jul 2026 – Sep 2026 • On site

- Designed and built from scratch the corporate site and modernized the brand of a telecom company with 40+ years of history, without breaking brand recognition.
- Full-stack architecture with Astro and React (frontend), Node.js, Express and Prisma (backend) and PostgreSQL, covering customer management, personal data, emails and billing; with Google Workspace, Resend and Factusol.
- Ran SEO and keyword research for Google and LLM-based search across Alicante, Murcia and Vega Baja, and set up GA4, Search Console and Looker Studio to measure performance

Spotlife — Growth Product Manager Jan 2026 – Jul 2026 • Remote

- Built the product analytics infrastructure from scratch in Amplitude: event taxonomy, user properties, tracking strategy, team dashboards and written documentation of the framework.
- Ran user interviews and qualitative research on how people discover, save and share places, turning behavioral patterns into acquisition, activation and retention decisions.
- Owned the end-to-end growth strategy and onboarding design, connecting UGC and recommendations to the B2B monetization model and reducing early drop-off.

HanditAI— Growth and Marketing lead Apr 2025 – Jun 2025 • Remote

- Ran GTM across two business models (B2B SaaS for self-improving AI and an open-source model monetized through infrastructure), including the transition between them.
- Led content-led growth on LinkedIn, Reddit and Product Hunt plus outreach and partnerships, raising pilot-to-paying conversion by 20%.
- Built growth analytics from scratch (Lovable, HubSpot and GitHub APIs) and an AI feedback system with n8n delivering daily recommendations to Growth, Product and C-level.

TuTrámiteFácil - Growth, Marketing Manager & CMO Mar 2024 – Oct 2024 • Elche University

- Legaltech matching citizens with the public financial aid they qualify for. I joined as Growth and stepped into the CMO role leading marketing across product, sales and customer success.
- Designed quasi-experiments on website flows, pricing and service positioning to lift conversion and cut CAC, backed by in-depth user interviews on purchase motivations.
- Built dashboards for marketing KPIs, unit economics and LTV used to communicate with investors and stakeholders.

Magnusem - Founder Nov 2021 – Jun 2022 • Alicante

PropTech for student housing in Alicante and Murcia: built and ran the business end-to-end (3 properties, 10+ rooms), from business model and website to sales and daily operations, with financial models, unit economics and investor pitches.

Own Projects

giip.me — link routing tool: reading-time and metadata validation, UTM builder and branded QR generator; currently adding dynamic QRs, HTML-to-Markdown for LLMs and a branded URL shortener.
lavidamodernaes.com — searchable archive of hundreds of phrases from the show, structured by season, author and episode.
In private beta: **squint.me**: real-time metadata, schema and LLM-readiness checks, **aromathic.com**: speech-to-text recipe network for family at this moment, and **cliima.com**: climate data for agricultural decisions.
